

thank

you

I would love to be able to go around to every member of the NCCC who have been so supportive in my educational quest and give them each a heart felt hug.

Over the Summer I had an amazing internship studying molt abnormalities in African Penguins which will be my honors thesis.

I am working in the admission office with the graduate students, a residents assistant in the freshmen dorm and also working for a promotional company for Coca-Cola, GM, Lego, Pedigree, Hershey and some vineyards to name a few. Each experience has brought new knowledge.

I hope to always make NCCC proud that they have helped to support me over my years as an undergraduate student.

I may not know all the members' names but you will all always be in my prayers

very much!

Sincerely,

Carah Austin

please share my thanks
to the members
